temp-rite is double ISO-certified!

Quality management:

Hospitals, retirement homes and similar institutions place the highest value on the quality of their suppliers' products and services. temp-rite fulfills these quality requirements in accordance with DIN EN ISO 9001.

Environmental awareness:

With the additional certification according to DIN EN ISO 14001, temp-rite in Germany emphasizes that environmental protection is taken seriously and that an acceptable, sustainable balance between ecology and economy is sought.

Temp-Trolley – Perfectly conceived

temp-rite

The Temp Trolley is a closed ward trolley constructed from a robust aluminum profile plug-in frame system. The interior lining is made of specially shaped stainless steel with deep-drawn gliders designed to accommodate various tray versions.

The double-walled walls and doors are insulated with CFC-free foam, providing a high level of thermal insulation. The doors are equipped with a locking system and a magnetic holder that allows them to open up to 270°.

At all four corners, there are vertical, ergonomically shaped round-tube push handles that ensure an optimal grip height for every user. They are continued along the top cover as a gallery and are protected by corner protection profiles.

The top cover is made of textured stainless steel. The surrounding lower bumper is designed to allow the installation of a towing system. The chassis consists of two fixed castors and two lockable swivel castors with a diameter of 160 mm, mounted in galvanized housings.

With temp-rite to the optimal meal distribution system

temp-rite

Plug-in aluminium profiles

= Lightweight and sturdy design offering high load capacity, corrosion resistance, and long-lasting durability

With temp-rite to the optimal meal distribution system

temp-rite

Variety of equipment and capacity

= Available with up to 30 slots to suit various ward and service concepts

With temp-rite to the optimal meal distribution system

temp-rite

Double-Wall Insulation

= Reliable temperature stability of meals throughout the entire transport

With temp-rite to the optimal meal distribution system

temp-rite

Surrounding gallery rail

= Additional storage space for ward supplies and meal service accessories

With temp-rite to the optimal meal distribution system

temp-rite

Hygienic design

= Smooth surfaces and rounded edges for quick and safe cleaning

With temp-rite to the optimal meal distribution system

temp-rite

Enhanced bump protection

= Protection of trolley, contents, and surroundings in every transport situation

With temp-rite to the optimal meal distribution system

temp-rite

Towing system

= Optional towing system to connect multiple trolleys for efficient logistics

With temp-rite to the optimal meal distribution system

temp-rite

Excellent Maneuverability

= Easy and comfortable handling with smooth-rolling castors and lightweight design

Features, that the Temp-Trolley Pro offers:

temp-rite

Ergonomic handling

Continuous push handles and weight-optimized aluminum construction.

= Comfortable operation for all handling and working heights

Deep-drawn gliders

Hygienic, easy-to-clean tray slots for various tray systems.

= Flexible and practical use

Features, that the Temp-Trolley Pro offers:

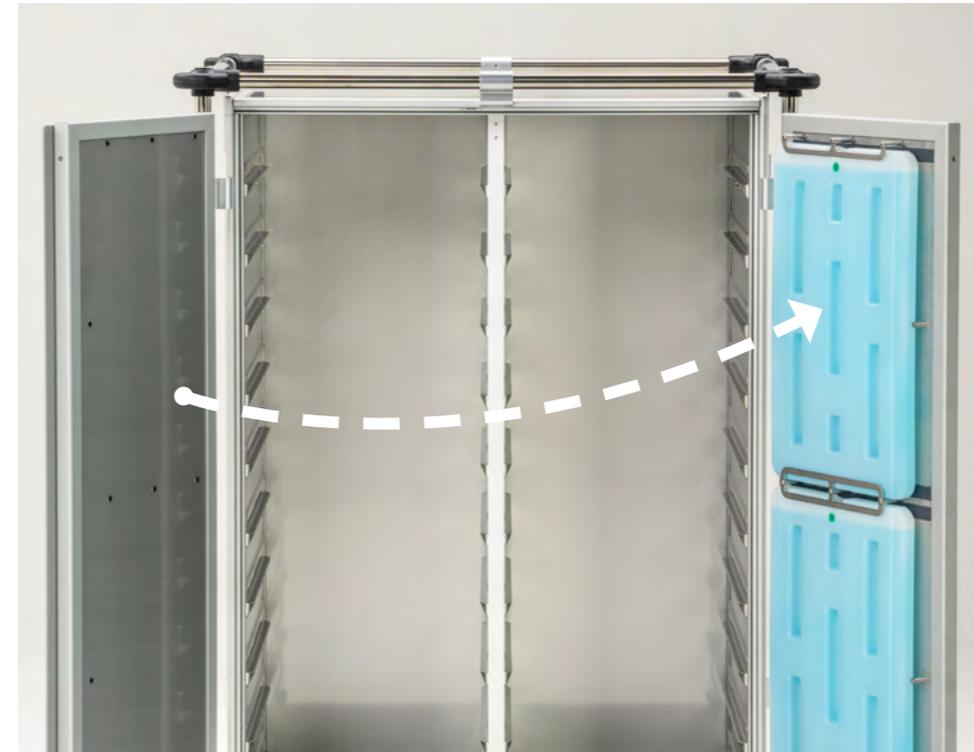

temp-rite

Passive cooling

Doors designed to hold eutectic plates with an integrated condensate tray.

= Maintains consistent meal temperatures for hours

Flexible Retrofitting

Doors designed for easy integration of passive cooling at a later stage.

= Maximum flexibility for future requirements

Temp-Trolley – Perfectly conceived

temp-rite

Functional

- Transport solution for various tray formats
- Passive cooling with eutectic plates
- Purpose-built, robust construction

Ergonomic

- Lightweight aluminum construction
- Excellent maneuverability
- Ergonomic push and pull handles

Comfortable

- Efficient towing system
- Easy-to-clean stainless steel interior
- Practical gallery for ward supplies

Economical

- Reduced maintenance and service costs
- Easy retrofitting of passive cooling
- High durability and robustness
